Project

TUESDAY

around the Sun

There were many Tuesdays.
Some Tuesdays were red,
some were mostly made from T's,
some were missing in the morning...

and one of them even forgot its
underpants.

There was also that one particular Tuesday. In the morning, everything smelled like chocolate cupcakes with vanilla cream. When Miss M entered the classroom, Eddie was already floating in the air like a true astronaut, Dylan was attempting to extinguish the volcano, Sunny was performing the most intriguing ballet turn, and Ethan was writing a book in Spanish about the trip to Mars. Miss M walked to her desk on her tiptoes, took Dylan's peculiar key, unlocked the door, and, together with the kids, went for a walk around the Sun.

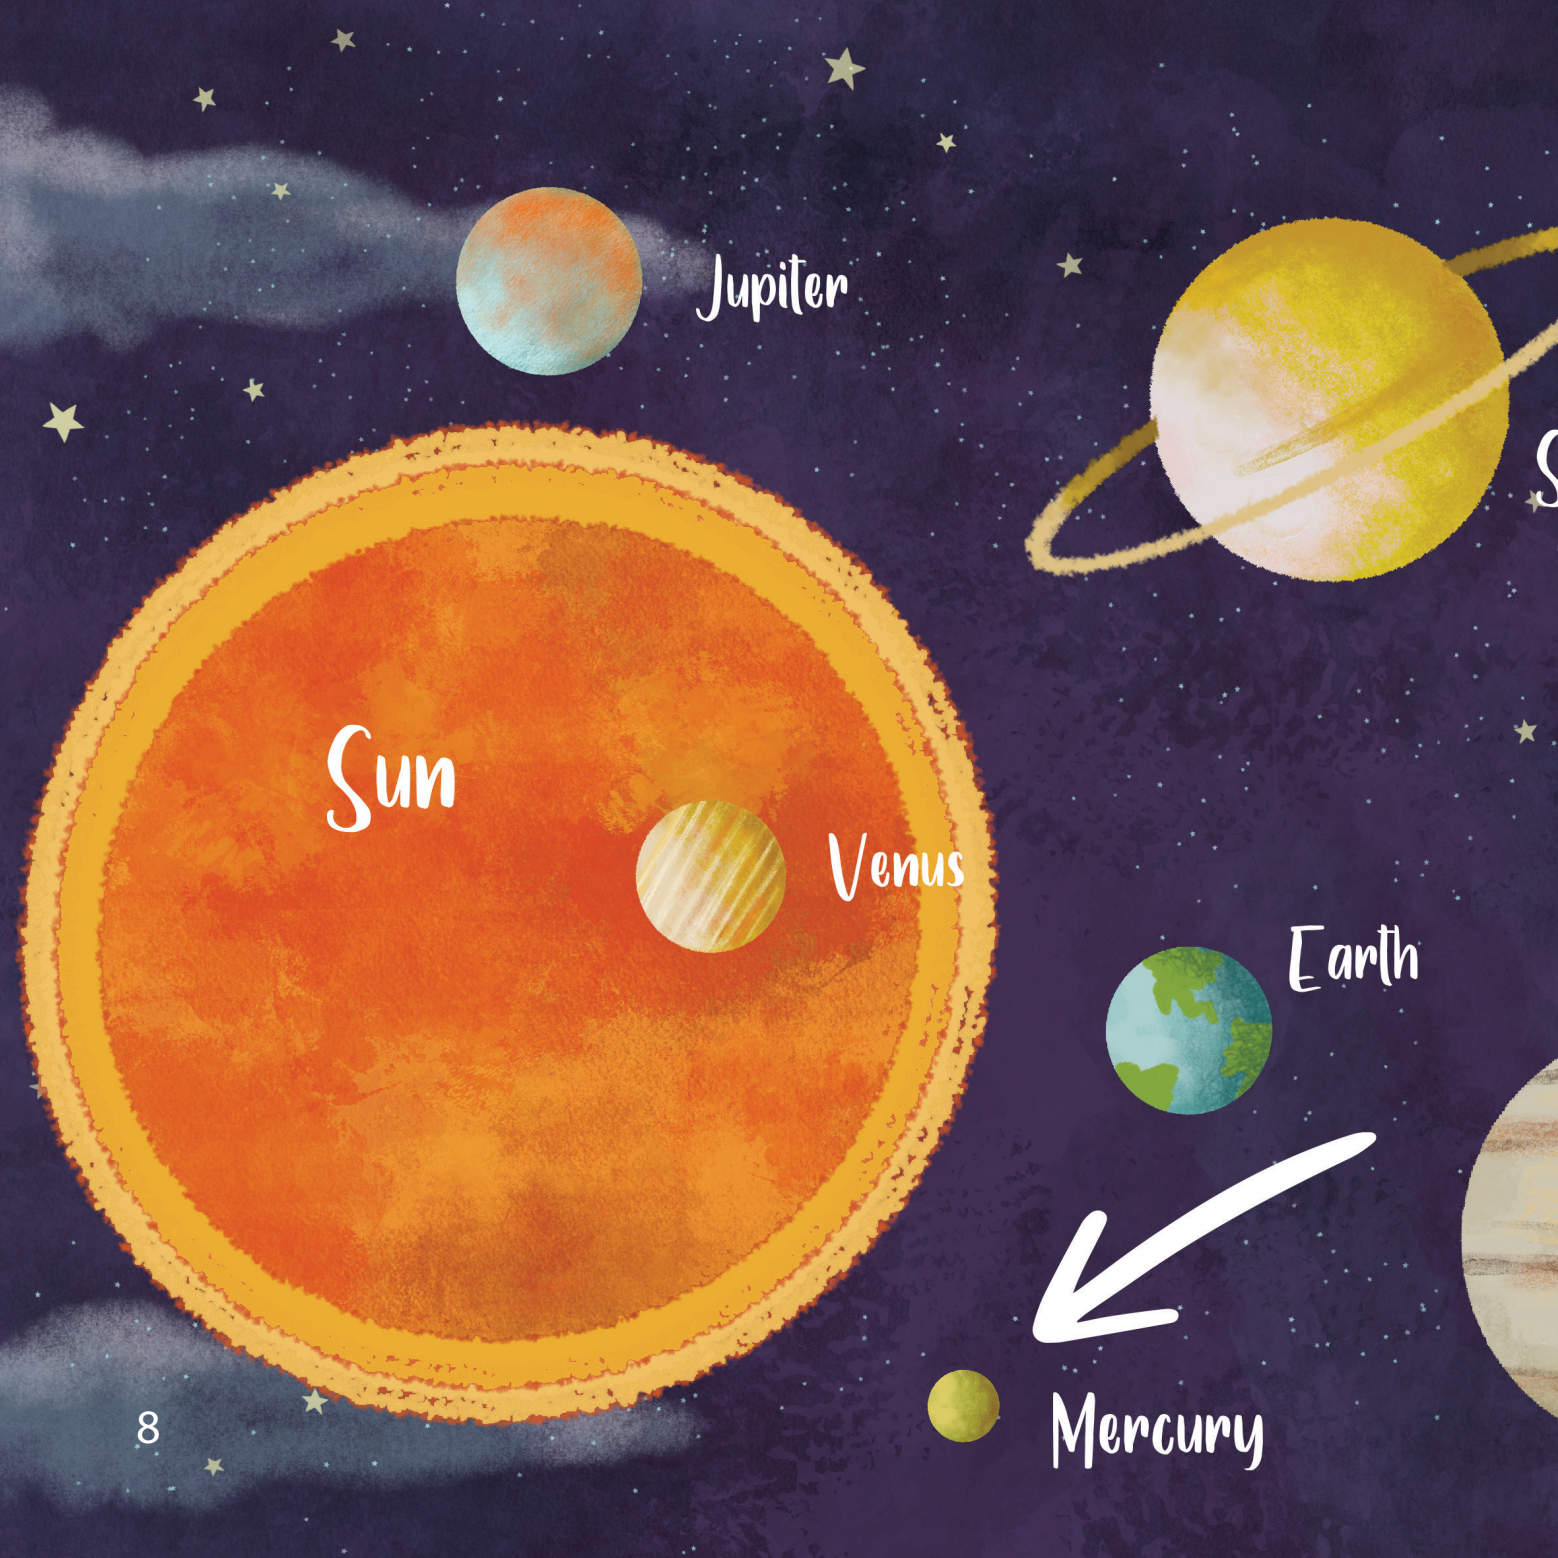

An illustration of a classroom scene. On the left, a woman with short brown hair, wearing a pink shirt and blue pants, stands with her arm outstretched. In the center, a young boy with dark hair, wearing an orange and brown striped shirt and blue pants, is walking and holding a blue book. To the right, a man with brown hair, wearing a dark suit and a green tie, is sitting and looking towards the boy. In the background, there are colorful balloons (blue, red, orange, green, purple) and a framed picture of a white object on a yellow wall. The floor is yellow with orange circles.

"It's too risky!" shouted Mr. Alex, while Mr. Ben was thinking out loud, "What are 3D shapes? What kind of 3D shape is that? I mean, the Sun?" The children shouted out, "It's a sphere! It's a sphere!" And that was precisely what Mr. Ben expected, so he was pleased and simply murmured, "Fantastic!"

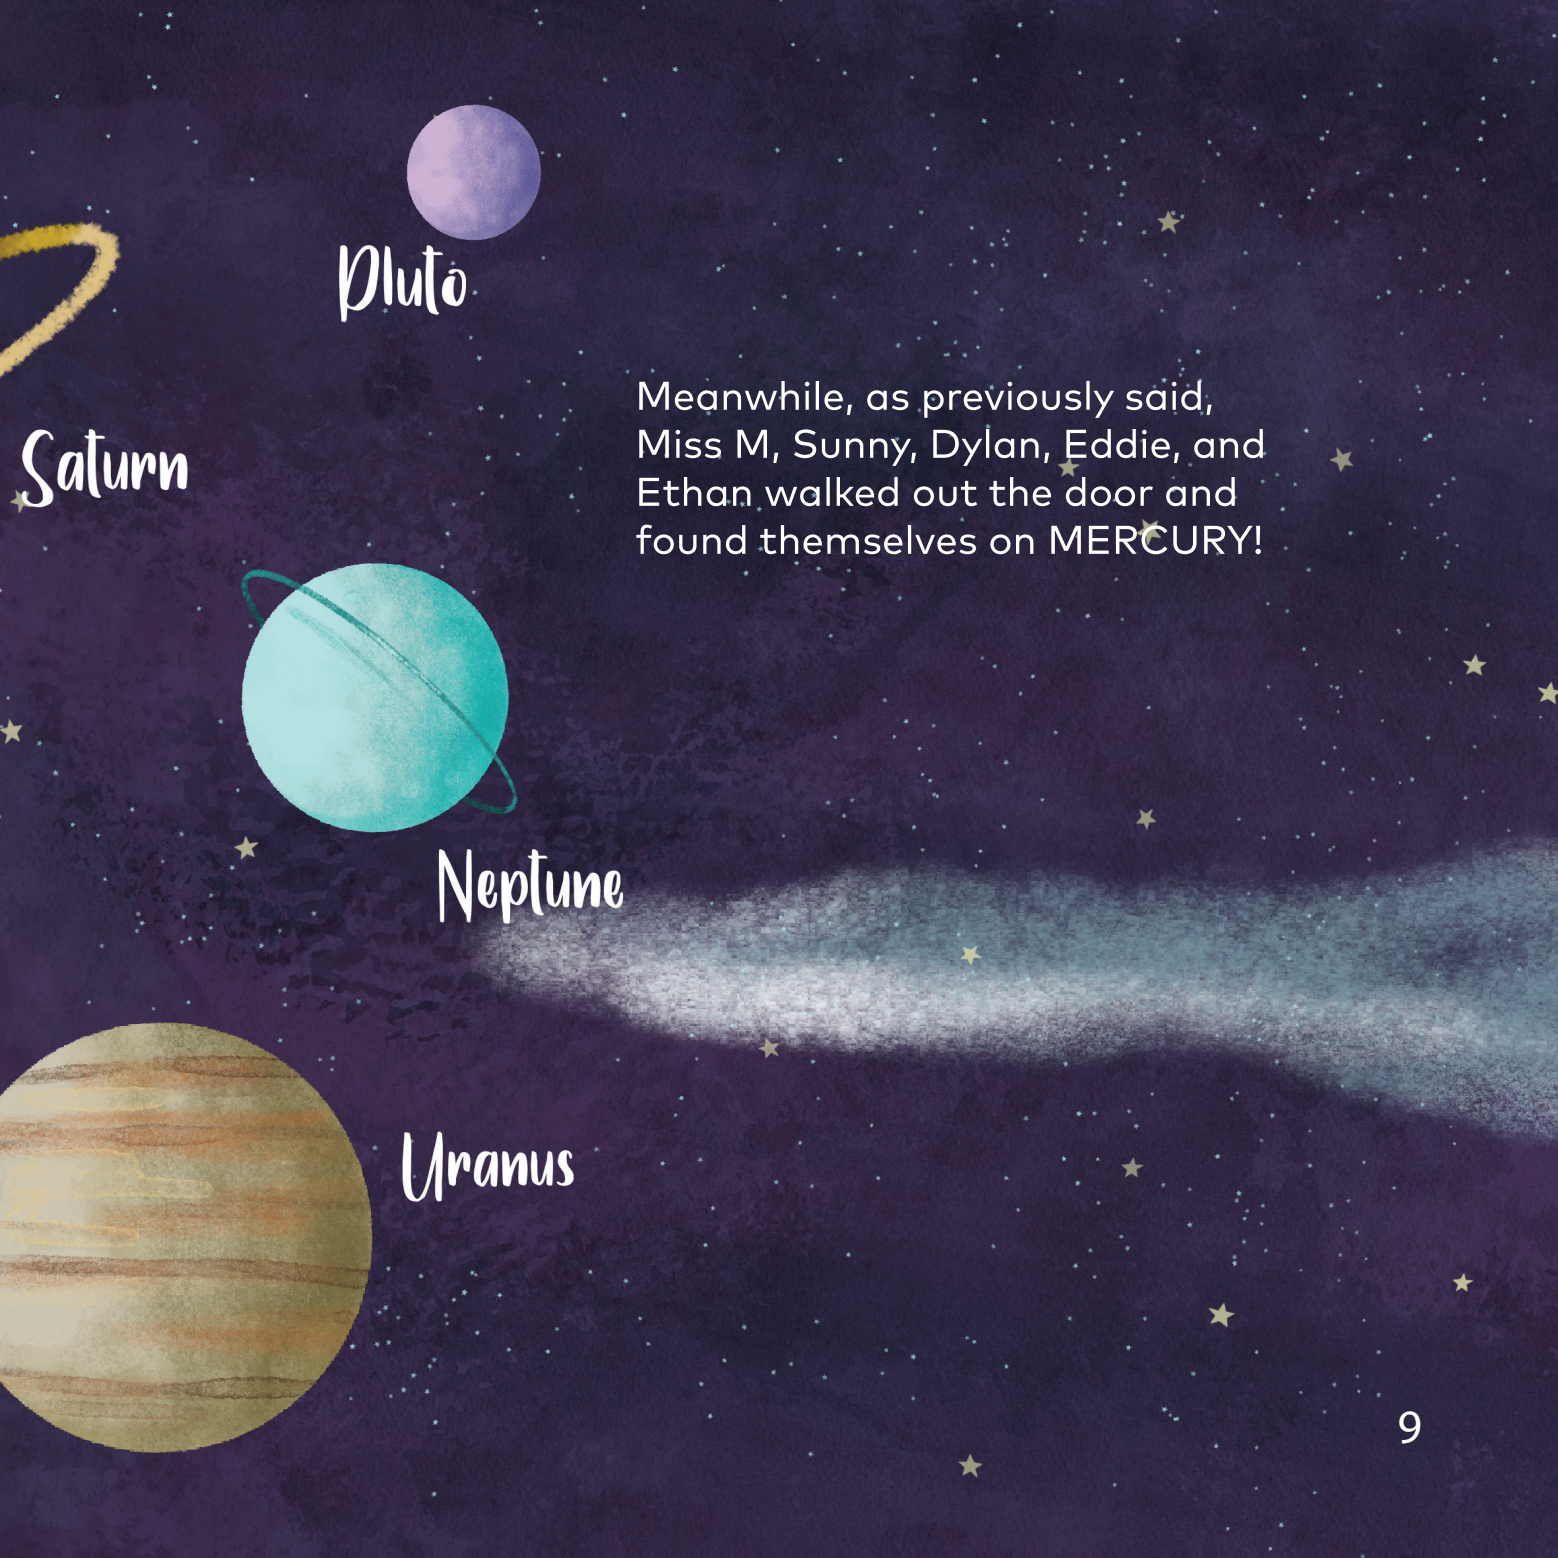

Sun

Jupiter

Venus

Earth

Mercury

Pluto

Saturn

Meanwhile, as previously said,
Miss M, Sunny, Dylan, Eddie, and
Ethan walked out the door and
found themselves on MERCURY!

Neptune

Uranus

The team wondered what to do as solar winds
blew all around them.

It was starting to get hot!

Dylan noticed: "It's just like a volcano
eruption!". "With a good wind," Eddie added,
"we could make a space jump like all true
astronauts!" Therefore, they waited for a few
moments before jumping into the...

"Sea of Stars", Ethan said. And he was right.

A whimsical illustration of a young boy with dark hair, wearing a blue and white striped shirt, purple shorts, and orange sneakers with white socks, running across a large, textured yellow celestial body. In the background, a large, pale yellow planet with prominent rings (Saturn) is visible against a dark blue space filled with white stars. Another smaller yellow celestial body is partially visible to the right. The boy is looking back over his shoulder with a slight smile.

Sunny didn't want them to lose their dignity, so they were gracefully skipping, jumping, turning, and leaping. Miss M and the kids eventually landed on Saturn's rings for some figure skating (even though Eddie and Ethan did only speed skating, but that was just right for the moment).

After a short break, the team decided to look for living and non-living things on Jupiter's moons (Mr. Jack's homework).

After discovering some ridiculous bacteria with vampire's teeth, they all sat down on a pretty funny-looking comet and returned to Earth for lunch.

Then they rested a bit and discussed what great adventure they would embark on in the afternoon...

And why is that? Because Miss M, Eddie, Ethan, Sunny, and Dylan were head over heels for learning!
